Care of Village Hall Floor

1. Do not wear stilettos.

2. If the floor becomes dirty do not slosh water over it as this will affect the finish and shorten its life. There is a special mop in the boiler room with a Velcro type head. There are two pads for the mop, one blue for wiping the floor with a spray of the solution that will be in the boiler room (ready mixed up in a bottle there). The other pad, which is green, is for dusting over the floor.

3. Do not drag chairs and other furniture over the floor but lift instead where possible.

4. When moving heavy items that cannot be lifted then please use one of the carpet offcuts provided in the chair store, turn the offcut upside down and drag the heavy item along on the offcut, thereby protecting the floor from potential scratching.

Thank you in anticipation for your co-operation in this matter which should help all users to enjoy the benefits of the new floor.
